

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OSSIAM GLOBAL MULTI-ASSET RISK-CONTROL (UCITS ETF 1C(EUR) ISIN:LU1446552496) a sub-fund of OSSIAM LUX SICAV

Management Company: Ossiam, part of the Natixis group of companies

Objectives and Investment Policy

Investment objective:

The investment objective of the OSSIAM GLOBAL MULTI-ASSET RISK-CONTROL is to reflect, before the Fund's fees and expenses, the performance of the Global Multi-Asset Risk-Control Index (the "Index") EUR closing level.

The Index is a total return index (net dividends reinvested) expressed in EUR. The Index is sponsored by Commerzbank AG (the "Index Provider") and calculated and published by Solactive AG (the "Calculation Agent").

The Global Multi-Asset Risk-Control Index reflects a long exposure on a combination of a "Risky Assets Portfolio" and a "Cash Portfolio".

The Risky Assets Portfolio is constituted by ETFs tracking a variety of asset classes: western equities, western treasury bonds, emerging markets (equities and bonds), corporate bonds, commodities, and real estate (together, the "Underlying ETFs"). The Underlying ETFs constituents of the Risky Assets Portfolio are weighted according to a mean-variance optimization process performed by the Calculation Agent.

The "Cash Portfolio" is constituted of money market ETFs (together, the "Underlying Cash ETFs").

The allocation between the Risky Assets Portfolio and the Cash Portfolio is calculated by the Calculation Agent with the objective of controlling the one year historical drawdown of the Global Multi-Asset Risk-Control Index.

For a detailed description of the Index, see section "Description of the Index" in the relevant Fund Appendix of the Prospectus.

Investment policy:

In order to achieve its investment objective, the Fund will use swaps with the objective of tracking the Index performance through synthetic replication. In that case, the Fund will invest in a portfolio of assets, the performance of which will be exchanged against the performance of the Index or a related index, or a portfolio of its constituents through a swap agreement with a swap counterparty. This method implies a counterparty risk as described in the below Risk and Reward Profile.

The net asset value per share of the Fund will therefore increase (or decrease) according to the evolution of the Index. The counterparty to the swap will be a first class financial institution that specializes in this type of transaction. The Fund may also enter into multiple swap agreements with multiple swap counterparties with the same characteristics as previously described.

The Fund shall be permanently invested for a minimum of 75% in equities or rights issued by companies established in countries of the European Economic Area having concluded a tax agreement with France including a clause on administrative cooperation for combating fraud and tax evasion.

In addition and on an ancillary basis, the Fund may use other derivatives for hedging and investment purposes and enter into securities lending and borrowing transactions as well as repurchase agreement transactions, as described under "Use of Derivatives, Special Investment and Hedging Techniques" in the Prospectus.

The Reference Currency of the Fund is the Euro.

The UCITS ETF 1C(EUR) shares are listed for trading on one or more stock exchanges and investors may buy or sell Shares through their usual broker on any trading day of the relevant stock exchange(s) which is also a Dealing Day in Luxembourg or, through a fund platform. Please contact your broker for additional information.

The UCITS ETF 1C(EUR) Share Class is an accumulating Share Class therefore income derived from the Fund is reinvested. Please refer to the section entitled "Subscription, Transfer, Conversion and Redemption of shares" and the section entitled "Practical information" of the Fund appendix in the prospectus for additional information.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within less than 5 years.

Risk and Reward Profile

The Fund is ranked 3 on the synthetic risk and reward indicator scale, which is based on historical data. Due to its exposure to diversified markets, the Fund may experience volatility, as expressed by its rank on the above scale. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Fund. The lowest category does not mean "risk free".

Special Risk Considerations

Index Risk: The value of the Fund's Shares is linked to the Index, the value of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that the underlying methodology of the Index will indeed result in a return above any comparable investment strategy or that they will recover their initial investment.

Derivative and counterparty risk: As a result of entering into swap(s) transaction(s), the Fund is subject to potential counterparty and issuer risk. In the event of insolvency or default of the counterparty or issuer, the Fund could suffer a loss.

The value of the swap(s) transaction(s) may vary according to several factors such as (but not limited to) the level of the Index, the level of interest rates and the liquidity of the equity market.

Please refer to the section entitled "General risk considerations" of the prospectus for additional details on risks.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Charges by Share Class-Share Class UCITS ETF 1C (EUR)

One-Off charges taken before or after you invest

Entry Charge	Maximum Sales Charge 3,00% Maximum Replication Charge for Subscriptions 1,00%
Exit Charge	Maximum Redemption Charge 3,00% Maximum Replication Charge for Redemptions 1,00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing Charges:	0.55% p.a.
Total Expense Ratio (TER)	

Charges taken from the Fund under certain specific conditions
